

# MATTAPALLY SATHWIK

+91 7995693254 — mattapallysathwik@gmail.com — Github — LinkedIn

## Professional Summary

---

Computer Science Engineering student with a solid foundation in software development, programming, database management, and web technologies. Experienced in building AI-driven and full-stack applications using C, Python, HTML, CSS, and SQL. Skilled in problem-solving, collaborative development, and adapting quickly to emerging technologies, with a strong interest in creating practical and scalable solutions.

## Education

---

### SR University, Telangana

Bachelor of Technology in Computer Science Engineering

Oct 2023 – Jun 2027

CGPA: 6.3/10

### SR Prime

Higher Secondary Certificate (MPC Stream)

2022 – 2023

Score: 719

## Technical Skills

---

**Programming Languages:** C, Python, SQL

**Web Technologies:** HTML5, CSS3

**Frameworks / Tools:** GitHub, VS Code, MySQL

**Core Concepts:** Data Structures, OOP, DBMS, Problem Solving

## Projects

---

### Parallel Domain Decomposition for Large-Scale Climate Modeling

2026

*Python, C, CSS, OpenAI API*

Such concepts as Domain Decomposition and Asynchronous Communication have improved global simulations. It is now possible to conceal the time required in processors to communicate with one another. What we are trying to know is the Virtual Earth. The Virtual Earth is extremely significant. As a result of this we can: Make it more realistic: It is possible to take the models and transform them into models that display individual clouds and storms. The Virtual Earth should be precise. Speed it up: Climatic forecasts should not take months but days. This implies that the policymakers are able to respond to the trends promptly. The Virtual earth is evolving rapidly. Make things more reliable: It is time to put our supercomputers to the test. This is to say that we obtain the results of the Virtual Earth.

## Achievements & Certifications

---

- Completed Cisco Networking Academy's CCNA: Introduction to Networks certification, gaining foundational knowledge in computer networks, IP addressing, routing, switching, and network security concepts.
- Completed a 10-week AI-ML Virtual Internship supported by Google for Developers, gaining practical exposure to machine learning, artificial intelligence concepts, and real-world project development.
- Participated in technical events, coding activities, and student development programs.

## Extracurricular Activities

---

- Participated in sports activities demonstrating teamwork, leadership, and discipline.
- Engaged in coding practice, peer learning sessions, and continuous skill development.
